

LA PALETTE NATURALISTA

Il carattere Naturalista porta con sé l'ampiezza cromatica della natura, delle stagioni e di una luce mutevole ma non artificiale.

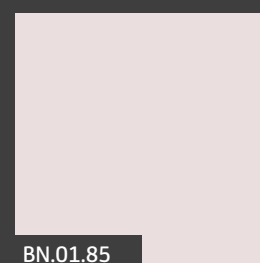

La palette colori del Naturalista lascia la massima libertà nell'abbinamento: si possono creare schemi cromatici in gradazione mantenendo il medesimo tono di colore. È possibile creare degli schemi utilizzando toni caldi e freddi oppure toni con gradi differenti di luminosità. Il risultato sarà sempre sorprendentemente naturale e armonioso.

I decorativi murali proposti in abbinamento alla palette cromatica, rispecchiano l'essenza della collezione: matericità, trasparenze e velature naturali integrano perfettamente l'armonia cromatica del carattere Naturalista. Viene, inoltre, posto un accento all'utilizzo dei legni.

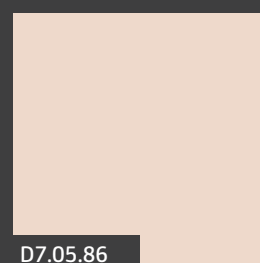

Catturando il Qr Code a pag. 4 o su www.sikkens.it/colori è possibile scoprire le nostre collezioni colori.
